

YOUR TECHNICAL PARTNER
IN THE UNITED KINGDOM

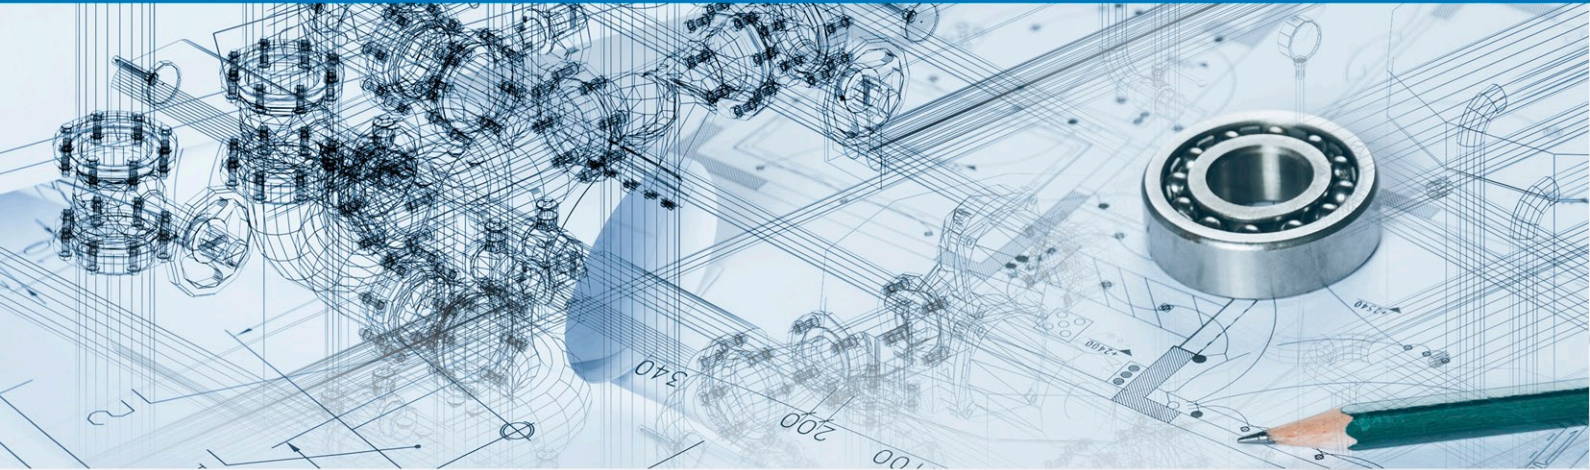

Professional installation, commissioning, and maintenance of production lines in the UK for EU-based manufacturers.

We eliminate post-Brexit barriers. While you deliver the technology to the UK, we ensure its flawless installation, commissioning, and technical support. Operating without administrative or logistical hurdles, we maintain the highest safety standards, as confirmed by our ISO 45001 certification.

Your UK Projects Under Full Control

Eliminating risks, optimizing costs, and building trust

18 YEARS OF GLOBAL EXPERIENCE

For nearly two decades, we have supported manufacturers across Europe, Scandinavia, and the USA. Throughout this time, we have mastered the art of adapting to the most demanding technical and legal requirements worldwide.

LOCAL PRESENCE IN THE UK

We manage ongoing installation projects in the UK, where we hold local VAT registration and **CIS Gross Payment Status**. This streamlines settlements, eliminates Brexit-related tax complications, and allows for efficient invoicing within the British tax system.

LIABILITY & ACCOUNTABILITY

Our Public Liability Insurance is fully recognized by British insurers and investors, meeting the rigorous contractual requirements of large-scale industrial facilities.

SAFETY FIRST

As an **ISO 45001** certified company, we manage occupational health and safety at the highest international level. For our partners, this guarantees that UK-based installations are carried out incident-free and in full compliance with strict HSE regulations.

Precision in Installation, Seamless Communication

Providing highly skilled personnel who serve as the flagship of your brand on-site

CERTIFIED PERSONNEL (CSCS & NPORS)

Our installers are an elite group of specialists trained for the rigors of British construction sites. Every employee holds a CSCS card, and our operators are NPORS-certified, ensuring full autonomy in operating heavy machinery.

ENGLISH-SPEAKING SUPERVISORS

We eliminate the risk of communication errors. Every crew works under the supervision of an English-speaking Supervisor, ensuring a smooth exchange of technical data between your engineers and the British site management.

CORPORATE-GRADE OPERATIONAL EXPERIENCE

Our technical culture has been forged through 18 years of operations at the world's most demanding industrial sites. We have successfully delivered installations at high-specification facilities owned by global leaders such as PepsiCo, Procter & Gamble, and Cemex, consistently meeting the most stringent safety and hygiene protocols.

REMOTE SERVICE TEAM – YOUR LOCAL SUPPORT

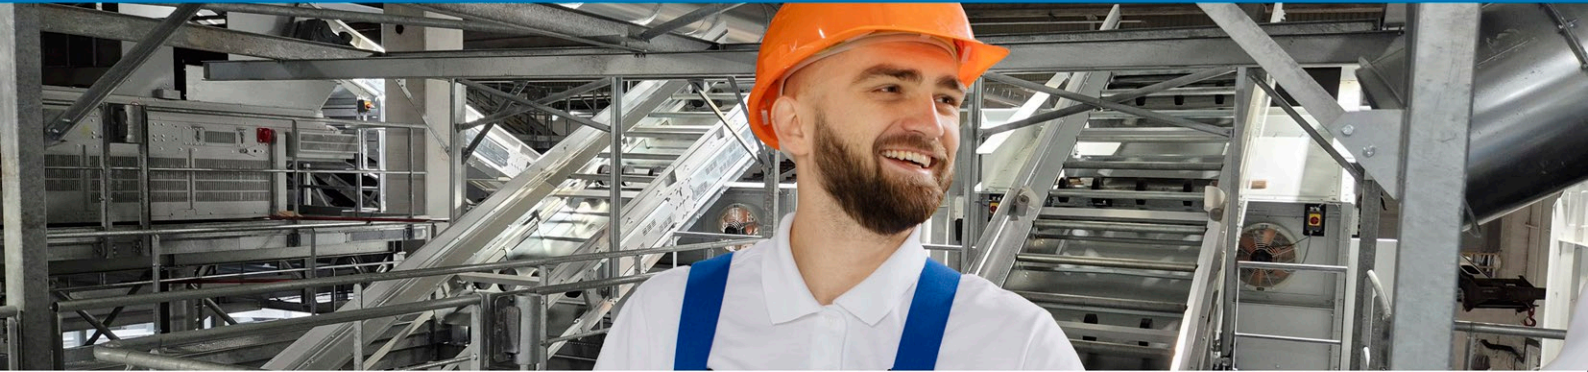

We offer more than just installation. Polmec can act as your remote service arm in the UK. Following installation, we can provide warranty care and ongoing maintenance for your equipment. Fully trained in your specific technology, we provide professional oversight and technical service directly at your clients' facilities in the UK, ensuring peak operational performance.

Your Machinery in the UK – Our Professional Installation

Turn the challenges of the British market into your competitive advantage

Why trust us?

- 1 Peace of Mind:**
18 years of global experience and an **ISO 45001** certified safety system
- 2 Full Compliance:**
CIS Gross Payment Status and local VAT registration in the UK.
- 3 Elite Workforce:**
Teams with **NPORS** and **CSCS** qualifications, led by English-speaking Supervisors.
- 4 Self-Sufficiency & Mobility:**
Our own service fleet and a comprehensive range of professional tools.
- 5 Financial Protection:**
Robust contractual security backed by a comprehensive liability insurance policy.

We look forward to working with you

Are you planning an expansion into the British market or do you need a trusted partner for installation and service? We are ready to assist. Contact us for more information or a detailed proposal.
